

One Of Nine To Be Named Arcadia Homecoming Queen

Nine Arcadia High School senior girls are vying for the homecoming queen title this year. The lucky lass, whoever she may be, will be crowned during half time ceremonies Friday, October 14, at the Arcadia-Elba football game.

A homecoming dance at the Arcadia American Legion Hall will follow the game.

Along with the king and queen, first and second attendants for both reigning monarchs will be announced. Votes cast by Arcadia High students will determine the winners.

Proceeding homecoming activities will be Spirit Week at Arcadia High. A full schedule of events involving the student body will conclude on the 13th with a large bonfire and pep rally in downtown Arcadia. Hot dogs and speeches to urge on the Huskie football team are planned.

One of the senior gridiron lettermen will be named the Arcadia Homecoming King.

Homecoming Queen candidates include:

Noralie Drake. The 17-year-old daughter of Mr. and Mrs. Darrel Drake has been active in basketball and other school sports. She earned an "A" letter in A.H.S. cage action last year. Her high school activities include Pep Club, cheerleading, and music. Her future plans include going on to college.

Chris Phillips. The 17-year-old daughter of Mr. and Mrs. Charles Phillips lists her interests as cooking, sewing, ceramics, and sports. An Arcadia High senior, Chris has been active in volleyball, basketball, track, cheerleading, band, and chorus. She is a member of the A-Club.

Doris Baumann. An exchange student at Arcadia High, Doris has been living with Mr. and Mrs. Don Landis of rural Arcadia. The 17-year-old West German native lists art, reading, and traveling as her hobbies. Doris told the Quiz her favorite subjects are art, mechanical drawing, and English.

Her high school activities include pep club.

Kathy Phillips. The daughter of Mr. and Mrs. Charles Phillips, Kathy has school activities that include volleyball, basketball, track, band, chorus and pep club. For the last three years she has been a class officer. Her outside interests include sewing, reading, and sports.

The 17-year-old Arcadia High senior's future plans include attending college. She plans to major in science and physical education.

Mitzi Lewandowski. The daughter of Mr. and Mrs. Carl Lewandowski, the 17-year-old Arcadia High senior has been active in sports for the last three years. Extracurricular activities she listed include basketball and volleyball, and cheerleading.

Her future plans are to attend Hastings Technical College and their secretarial training.

Lisa Leach. Lisa, the daughter of Mr. and Mrs. Ladd Leach, plans to attend college next fall where she will major in early childhood development.

The 17-year-old miss lists hobbies that include riding horses, and water skiing.

Penny Staab. The daughter of Mr. and Mrs. Max Staab,

QUEEN CANDIDATES — Potential Arcadia Homecoming Queens are (top to bottom) Jill Bulger, Nora Drake, Kathy Phillips, Lisa Leach, Penny Staab, Chris Phillips, Mitzi Lewandowski, Doris Baumann, and Colleen Psota. All are Arcadia High seniors.

Penny has been active in volleyball, cheerleading, and track during her Arcadia High years. She is a member of the A Club and vice president of the senior class.

Penny lists her likes as including sports, bicycling, and home economics.

She is 17 years old.

Mitzi Lewandowski. The daughter of Mr. and Mrs. Carl Lewandowski, the 17-year-old Arcadia High senior has been active in sports for the last three years. Extracurricular activities she listed include basketball and volleyball, and cheerleading.

Her future plans are to attend Hastings Technical College and their secretarial training.

Lisa Leach. Lisa, the daughter of Mr. and Mrs. Ladd Leach, plans to attend college next fall where she will major in early childhood development.

The 17-year-old miss lists hobbies that include riding horses, and water skiing.

Penny Staab. The daughter of Mr. and Mrs. Max Staab,

Electric Bills May Be Sky High

The Ord Quiz recently learned Ord electrical users may face skyhigh electrical bills in the near future. During the Monday night city council session, Ord Mayor Gaylord Bolesen revealed the city's allotment for natural gas to power the city-owned electrical generating plant will likely run out by the end of this month.

This allotment is provided in an agreement between the City of Ord and the Kansas-Nebraska Gas Company.

Currently Ord has an interruptible service contract with K-N. Under those contract provisions, the company notifies the Ord generating plant to switch to diesel oil during peak gas consumption periods. This allows K-N to continue supplying customers having a non-interruptible status.

Costs of the diesel oil are passed along to electrical users in the form of a fuel adder tax.

Exact cost figures on just how much more electrical bills may be when the gas allocation expires aren't known. Ord Mayor Gaylord Bolesen and City Utilities Commissioner Gene Baugh weren't available for comment by press time Wednesday. However, the price hike to electrical users could be sizeable.

The only other alternate source of electrical power, the interconnect station, will probably not be finished until December according to information revealed at Monday's council session.

Mayor Bolesen then remarked that steel needed to complete the interconnect station will probably be shipped around the middle of November.

Utilities Commissioner Gene Baugh estimated that the interconnect station will probably be completed around mid-December — if the weather is favorable.

This means that city electrical users could face 45 days of power provided by a source of low cost off peak power and, when needed, emergency power to Ord electrical users.

The interconnect station, located southwest of Ord, will serve as a source of low cost off peak power and, when needed, emergency power to Ord electrical users.

The interconnect station, located southwest of Ord, will serve as a source of low cost off peak power and, when needed, emergency power to Ord electrical users.

The interconnect station, located southwest of Ord, will serve as a source of low cost off peak power and, when needed, emergency power to Ord electrical users.

The interconnect station, located southwest of Ord, will serve as a source of low cost off peak power and, when needed, emergency power to Ord electrical users.

Ord Area Corn Harvest Begins

Many area farmers began harvesting their corn last week. Rains received Saturday and Sunday temporarily halted the work. Clear skies Monday lured many farmers back into their fields.

A check with area elevators brought indications that yields are averaging between 100 and 140 bushels an acre, yields one farmer observed are "good in any man's book."

Corn brought in thus far has averaged around 20 to 24 percent moisture content and weighs in at 55 to 58 pounds per bushel.

Darrell Heisner of the Ord Grain Company observed that moisture received thus far this year along with other weather conditions has pushed the picking period up two weeks. Most years, he stated, picking starts around October 15.

Virgil Benek of the Farmers Co-Op Elevator in Ord com-

mented that the corn he has seen so far looks real nice and has a good weight to it.

Other estimates were that corn grown this year will likely surpass last year's yield by around 20 bushels an acre with dryland crops averaging around 50 to 70 bushels per acre and irrigated corn yielding 120 bushels per acre.

Dave Zebert told the Quiz one patch of corn grown on his farm 3 1/2 miles northeast of Ord yielded around 158 bushels per acre with a 14 1/2 percent moisture content count after drying.

Valley County Agent Ron Engleke concurred that this year's corn yield so far looks very promising. However, he cautioned farmers to watch out for the corn borer also known as the root worm. The insect can cut yields drastically Engleke said.

Adult Ed. Class Schedule Posted

At the conclusion of an Adult Education organizational meeting last Wednesday at Ord High, the following class schedule was drawn up.

Reynolds, Tuesday, 7:00, Ruth Powers.

Intro. Typing, Wednesday, 7:00, Al Cudly.

Speed Reading, Monday, 7:30, Crystal Brockman.

Accounting, Tuesday, 7:00, Mick Puckett.

Woodworking, Tuesday, 7:00, Arden Koelling.

Other classes that may be offered if enough interest is shown include electrical wiring, macrame, guitar, income tax, law for the layman, and pottery and ceramics.

All classes scheduled for Wednesday will meet Wednesday, October 12. October 5, the previous Wednesday, Ord High will be holding class night.

Ed Bosworth, an Adult Education official, said that in many cases only one to four persons are needed to register before these classes will be presented. He urged all interested persons to contact him.

Handibus May Start Here on Oct. 12

If all goes as scheduled senior citizen handibus service to Ord may start October 12, according to Rosa Radl of the Central Nebraska Community Action Agency. The service will be open to persons over 60 years old or handicapped.

In a Quiz interview last week, Radl revealed tentative plans are for the bus to be at the Parkview retirement village in Ord at 9, 11, 1 and 3 October 12 for trips to the downtown area.

Others wanting the bus service should call Central Nebraska Ord offices at 728-5390. Required information includes the caller's name, address, destination, and time the bus should stop at the caller's home for the trip.

Eligible riders can go to any destination within the city limits. However, most trips, Radl speculated, will be to the downtown area.

The Ord City Council recently approved a six-month trial period for the tax subsidized service to senior citizens and handicapped persons living in the Ord city limits. Should it prove successful, there is a chance it might be continued.

There is no charge for the rides, but donations to defray expenses are accepted.
